Leetcode  GFG 

Education

Parul Institute Of Technology	2023 - 2027
Bachelor of Technology in Computer Science	(CGPA: 7.08)
PARVATI KIC SONAURA SANT KABIR NAGAR	2020 - 2022
12 th (Board of High and Intermediate Education, UP)	(Percentage: 63.8%)
PARVATI KIC SONAURA SANT KABIR NAGAR	2018 - 2020
10 th (Board of High and Intermediate Education, UP)	(Percentage: 72.33%)

Technical Skills

- **Languages:** Java, Python, Java Script, C / C++ Programming
- **Web Development:** MERN Stack, HTML, CSS, Tailwind CSS, React
- **Databases:** MongoDB, MySQL
- **Libraries:** NUMPY, PANDAS
- **Tools :** Git, GITHUB, Postman
- **Coursework:** Data Structures and Algorithms, Database Management System (DBMS), Operating System, Object Oriented Programming (OOPS), Basics of System Design, Basics of SDLC

Projects

Grocery Delivery Application  Grocery Delivery Web App Oct 2024 - Apr 2025

Technologies Used: HTML, CSS, JavaScript, REST API, MERN Stack, Tailwind CSS

- Developed a full-stack grocery delivery platform enabling users to browse, add to cart, and place grocery orders online.
- Built and integrated RESTful APIs for product listing, order management, and authentication, Improving system efficiency by 40%.
- Added location tracking, address management, and secure payment options, ensuring Timely and accurate deliveries.
- Designed a responsive, modern interface using ReactJS and Tailwind CSS, enhancing user experience.

Leet Code Stats Dashboard  Leet Code Statistics Web Application

May 2024 - July 2025

Technologies Used: HTML, CSS, JavaScript, Google Gemini API, REST API

- Built an interactive AI-powered chatbot web application enabling users to send text and image-based queries and receive real-time responses using Google Gemini API.
- Implemented image-to-text and multimodal AI features allowing users to upload images and receive contextual AI-generated insights.
- Designed an intuitive chat UI with message threading, image preview, loading states, and smooth scrolling to improve user interaction and usability.
- Developed secure API request handling and dynamic content rendering using JavaScript, ensuring reliable communication with the AI model.
- Optimized the front-end layout for responsiveness and accessibility, providing a seamless experience across devices.

BUILD AI PRODUCTIVITY OS  AI-Productivity-OS

May 2024 - July 2025

Technologies Used: React.js, Tailwind CSS, JavaScript, Node.js, Express.js, MongoDB, Python, REST API

- Developed a full-stack AI-powered productivity and workflow management platform with separate frontend and backend architecture for scalable application development.
- Built responsive dashboard modules including task management, notes, calendar integration, AI assistant, and productivity tracking features.
- Implemented RESTful APIs using Node.js and Express.js with modular MVC architecture including

- controllers, routes, middleware, and database utilities.
- Designed interactive and user-friendly UI components using React.js, Vite, and Tailwind CSS to improve user experience and responsiveness.
- Integrated backend database handling and utility services for efficient task storage, retrieval, and workflow management.
- Utilized GitHub for version control, deployment, and collaborative project management with organized project structure and reusable components.

Achievements and Certificates

- Solved **904+** Problems across platforms (**848+** on *Leet code*, and **56+** on *GFG*).
